

PETROLEUM INDUSTRY AUDITOR LIST

TERMS AND CONDITIONS WHEN CONTRACTING ENFORM EXTERNAL AUDITORS

By accessing or using the Petroleum Industry Auditor List you agree with these terms and conditions. Enform reserves the right to change the terms and conditions, you are responsible for regularly reviewing these terms and conditions. Enform does not undertake any liability relating to a contract agreement that you may enter into by engaging an auditor provided on this list.

1. REFERENCES CHECKS

Enform recommends that the client obtain at least three professional references when contracting an auditor. Reference checks should include copies of recent auditing work completed for previous or current clients.

2. QUALIFICATIONS

The client is encouraged to review the qualifications of the potential auditor to meet or exceed the requirements for the work being undertaken. Qualifications include experience, training, and education of the auditor being considered. The auditor certification may only be one consideration when determining the qualifications of a potential auditor.

*All audits with a start date on or after July 1, 2010 must be performed on the New Audit Protocol. The auditor will need the New COR Audit Protocol Seminar (NCAPS) to be qualified to perform the audit. Further, As of June 30, 2010 the new External Auditor Qualifications take effect where the external auditor will need to meet the following requirements:

- Hold a certificate, diploma, or degree in Occupational Health and Safety (OHS) or a Canadian Registered Safety Professional (CRSP) or other equivalent safety designation.

3. COMPENSATION

Enform does not determine compensation rates for auditors. Auditor compensation is fair market value based on a negotiation between the auditor and client. It's important to note that the auditor is not an employee of Enform or engaged in contract work with Enform. The auditor conducts the business independently and is not managed, directed, or owned by Enform in whole or in part. The client needs to ensure they have conducted their own due diligence before hiring an auditor.

4. QUALITY ASSURANCE

Enform, as a Certifying Partner, conducts quality assurance reviews to ensure all audits meet the required standards. Standards are set by the WCB, industry and government departments. Enform maintains standards through a detailed quality assurance manual.

5. ENFORM AUDIT REVIEW FEE SCHEDULE

Enform collects an audit review fee for reviewing audits and processing COR requests. In addition, Enform staff under the direction of industry committees represents the petroleum industry with government and the WCB with respect to COR issues.

Please visit our website at <http://www.enform.ca/COR/FeeSchedule> for the current fees charged by Enform to administer the COR program

6. ENFORM EXTERNAL AUDITOR CODE OF ETHICS

Enform approved auditors are bound by a Code of Ethics/Conflict of Interest Guideline and are subject to disciplinary action if it is determined that the code has been breached.

7. AUDIT REGISTRATION SYSTEM

It is the auditor's responsibility to register the audit with Enform to ensure all of the required standards are being followed. Each ARS form will need to be accompanied by a signed Letter of Agreement by both the auditor and the client. The auditor has 45 days to complete the field audit and an additional 45 days to write the report and submit it to Enform for review. Enform is expected to strictly maintain the 90 day time period as part of the government standards. Audits that are received beyond this date cannot be reviewed.

The client is responsible for arranging for an audit within the applicable calendar year to maintain or renew their COR.

The client is responsible for ensuring their auditor has registered their audit through the Audit Registration System (ARS). The client is responsible for signing this document as requested by their auditor to ensure the audit is registered in the timeframe expected by the Certifying Partner.

8. COR EXPIRY DATE

The COR is issued for a three year period commencing on the last day on site of the initial or renewal audit. Enform cannot grant extensions to this date under any circumstances.

Please ensure your audits are submitted well before the COR expiry date. The governing body rarely grants extensions and only under extreme circumstances. Please plan your audits in advance and do not rely on an extension being granted.

9. PARTNERS IN INJURY REDUCTION (PIR)

The PIR program provides financial incentives for participation in the COR program. The client must apply for the rebate program in the prior calendar year. Please see the WCB website for further details or contact your local WCB representative.
